Carbon Finance - Sonia Labatt 2007-04-06

Praise for Carbon Finance "A timely, objective, and informative analysis of the financial opportunities and challenges presented by climate change, including a thorough description of adaptive measures and insurance products for managing risk in a carbon constrained economy." –James R. Evans, M. Eng. P. Geo., Senior Manager, Environmental Risk Management, RBC Financial Group "Climate change will have enormous financial implications in the years to come. How businesses and investors respond to the risks and opportunities from this issue will have an enormous rippling effect in the global economy. Sonia Labatt and Rodney White's insights and thoughtful analysis should be read by all who want to successfully navigate this global business issue." –Andrea Moffat, Director, Corporate Programs, Ceres "In Carbon Finance, Labatt and White present a clear and accessible description of the climate change debate and the carbon market that is developing. Climate change is becoming an important factor for many financial sector participants. The authors illustrate how challenges and opportunities will arise within the carbon market for banking, insurance, and investment activities as well as for the regulated and energy sector of the economy." –Charles E. Kennedy, Director and Portfolio Manager, MacDougall, MacDougall & MacTier Inc. "Climate change is the greatest environmental challenge of our generation. Its impact on the energy sector has implications for productivity and competitiveness. At the same time, environmental risk has emerged as a major challenge for corporations in the age of full disclosure. Carbon Finance explains how these disparate forces have spawned a range of financial products designed to help manage the inherent risk. It is necessary reading for corporate executives facing challenges that are unique in their business experience." –Skip Willis, Managing Director Canadian Operations, ICF International "In this timely publication, Labatt and White succeed in

communicating the workings of carbon markets, providing simple examples and invaluable context to the new and changing mechanisms that underpin our transformation to a carbon-constrained world. Carbon Finance will be the definitive guide to this field for years to come." –Susan McGeachie, Director, Innovest Strategic Value Advisors, Graduate Faculty Member, University of Toronto; and Jane Ambachtsheer, Principal, Mercer Investment Consulting, Graduate Faculty Member, University of Toronto

Reinsuring Health - Katherine Swartz 2006-05-11

America's current system of health insurance, which relies almost exclusively on employer-sponsored coverage, is in danger of collapse, and this problem is

not limited to the poor and working class. An increasing number of middle class Americans do not have employer-provided insurance and—due to skyrocketing premiums—cannot afford to purchase coverage for themselves. Reinsuring Health, by economist Katherine Swartz, examines this growing national crisis and outlines a concrete plan to make health insurance accessible and affordable for all Americans. Reinsuring Health documents why the number of uninsured Americans—now 45.5 million people—has grown in the last twenty-five years. Swartz focuses on how labor market changes—such as the decline of domestic manufacturing, decreased unionization, and the growth of non-standard work arrangements—have led U.S. employers to retreat from providing health insurance for their workers. These trends, combined with the increasing costs of medical care, have led to an explosion in health insurance premiums and a decline in coverage, particularly among the middle-class. Since those who seek insurance as individuals are generally most likely to need health care, private insurers charge higher premiums in the individual (non-group) markets than to people who obtain group insurance. This makes individual health insurance less attractive to the young and increasingly unaffordable for middle-class Americans. Similarly, insurers charge higher per person (or per family) premiums to small firms than to large companies, so many small firms do not sponsor coverage for their employees. Reinsuring Health shows how these problems can be overcome if the federal government provides a new reinsurance program which would protect insurance companies that provide small group and individual health insurance against the possibility that their policy-holders will incur very high medical expenses. By assuming some of the risk that people will face extremely costly medical bills, the government will make insurers less hesitant to offer coverage to high-risk individuals, and will help drive down premiums for others. Reinsuring Health demonstrates that this form of government reinsurance has worked in the past, helping to establish smooth running private markets for catastrophe insurance and secondary mortgages. Today, growing numbers of middle class Americans lack health insurance. Protection against the possibility of falling ill or getting hurt and having to pay extraordinary health care bills should not be a luxury available only to the very rich and the very poor. Reinsuring Health proposes a straightforward solution that would bring health insurance back within the reach of the increasing ranks of the uninsured, particularly those who are in the middle class.

Care Without Coverage - Institute of Medicine 2002-06-20

Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for

adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.
